

Student feedback - Manurewa High School

The united against cancer was a good opportunity to learn about some new information that I didn't know about the human body that my family members did not teach me to be aware of.

Jade Taranaki Year12 MHS

I thought the united Against Cancer Presentation was very interesting. My favourite one was the two Pasifika ladies who were talking about all the different jobs other than just nurse and doctor that Pasifika people could go into, and the scholarships which was very helpful as a Pasifika person. I also thought that the presentation about the testicle cancer was also very helpful and useful for the male students who had attended as it is an illness, which is rarely addressed, so presenting about it helps them to get help if they need it. Overall, the workshop was interesting, helpful and very informative. I was also very grateful for the bag of Chemist Warehouse goodies.

Jessicle Ailima Year 11 MHS

Learning about Cancer, especially of reproductive organs can be very intimidating and awkward but the interactive session (e.g. silicon testes, quizzes / prizes and etc.) made it memorable and an important lesson. The presentation provided helplines and channels of support through organisations such as Canteen, familiarizing students of the support out there with the message of- "You're not alone". Presenters were charismatic and made understanding easy, making them perfect educators, would recommend others to experience the seminar.

Juhi Ram Year 12 MHS

I found the experience to be extremely delightful. The people presenting were all kind and knowledgeable which showed me that they're passionate about what they're doing. My highlight was the number of goodies we were gifted and the Prezzy cards, it really made the audience stay awake and attentive. Also, the fact that they went up to students and talked about testicles, I found was very amazing because it's not a topic that is discussed often, so it is good to be aware. Overall, the experience was amazing from the information on food to all the different types of cancers. It really opened my eyes. 10/10 experience, loved the gifts and knowledge, THANK YOU! ***Tanahvat Leng Year 12 MHS***

I really enjoyed the session, it was super interesting and had a good mix of speakers. Ganesh Raj's part about food was a highlight for me. ***Devika Narayan Year 11 MHS***

My favorite part of the program would have to be the presentation about testicular cancer, which was presented by a doctor, he shares that with every experience he has had, it was about raising our awareness about signs and how to seek help if something doesn't feel right.

Kisa Falemai Year 11 MHS

Thank you for an amazing experience through the interactive activities that you provided. From the workshop on United Against Cancer, not only did we gain new knowledge about testicular cancer, but we also learned about other organisations like Canteen that support our community and family with cancer. We also enjoyed learning about cooking and how we all can cook food on a budget and still create a delicious meal. ***Kisa Falemai Year 11 MHS***
